Live Your Most Convenient Life

Today's world revolves around mobile devices. Laptops, smart phones, and tablets allow us to work from anywhere, communicate with anyone, and access almost any information that we need. Their convenience is undeniable, but given the right accessories, they can achieve much greater potential.

Silicon Power offers a range of accessories to maximize and enhance your mobile device experience. Our power banks, wall chargers, and wireless charging pads give you options to keep those mobile devices powered and running with you. Our sync and charge cables enable you to connect with other devices – whether yours or those of a friend. And, our TWS earbuds allow you to seamlessly listen to your favorite music without being tied down by wires.

Over the past 20 years, Silicon Power has evolved to become so much more than a trusted provider of industry-leading storage solutions. Live your most convenient life and make the most of your mobile device investment with essential everyday products from our accessories line.

A man with a beard and sunglasses, wearing a white striped polo shirt, is sitting by a swimming pool. He is holding a small, green, rectangular power bank in his right hand. A black cable is plugged into the power bank. The background shows the blue water of the pool and some blurred structures in the distance.

Power Banks

Silicon Power is re-defining what more a power bank can do with 4 instinctive built-in technologies that work to bring you the smartest and fastest charge possible

4CORE TECHNOLOGIES

smart**SENSE**

smartSENSE is an intuitive and universally-compatible charging technology that maximizes charging speed and auto-pairs with nearly any device. It's compatible with Quick Charge (QC3.0), Power Delivery (PD), Apple Fast Charging, Samsung Fast Charging, and more to charge at the fastest possible speed. The auto-pairing function is an added convenience that facilitates the "plug-in-and-go" lifestyle with one less button to press.

smart**FOCUS**

smartFOCUS is an advanced calibrating technology that stabilizes voltage currents throughout the charging process to sustain maximal charging power. Generic power banks are not equipped to handle fluctuations in voltage currents, which leads to under-utilization of charging power and therefore longer charging times. **smartFOCUS** cuts charging times by maintaining a steady stream of full charging power.

smart**BOOST**

smartBOOST is a dual-engine speed-enhancing technology that utilizes advanced high-speed charging rates via PD or QC3.0. Simply plugging in a fast-charge-enabled mobile device will allow the power bank to automatically adjust itself to the fastest possible charging speed; that means up to 2.5 times faster versus conventional charging speeds. **smartBOOST** was designed for PD/QC3.0 models not only to maximize speed, but also to maximize time.

smart**SHIELD**

smartSHIELD is a comprehensive 12-point safety guard that ensures total protection against vulnerabilities for both users and devices. That means protection from overcharging, overheating, fires, and even explosions – plus more, for unmatched peace of mind. **smartSHIELD** eliminates the risks of charging with generic power banks by implementing a safety system that was designed to keep both users and devices protected.
